

PUBLICATION FROM CSIR-NIScPR
MALPA LANDSLIDE DISASTERS
 Documenting Devastating Disasters

- 1998 & 2017. Two years...two landslide disasters...same place – Malpa village in Pithoragarh, Uttarakhand.
- Malpa will be etched in history as the site of the two most devastating landslides in India.
- Here is the story of how it all unfolded...not once but twice...a blow-by-blow account by those who witnessed the disaster...and by those who survived it.
- Scientifically documented in great detail by experts in disaster studies and research.
- A story of great educational value for disaster & rehabilitation managers, engineers, researchers, teachers, students and affected communities.
- A joint publication of CSIR-National Institute of Science Communication and Policy Research and Indian National Academy of Engineering's Forum on Engineering Interventions in Disaster Mitigation.

Pages: 84
Price: 200/-
Postage: 50/-
ISBN: 978-81-7236-362-8
ISBN: 978-81-7236-363-5 (eBook)

A Treasure Trove of
Scientific Knowledge!

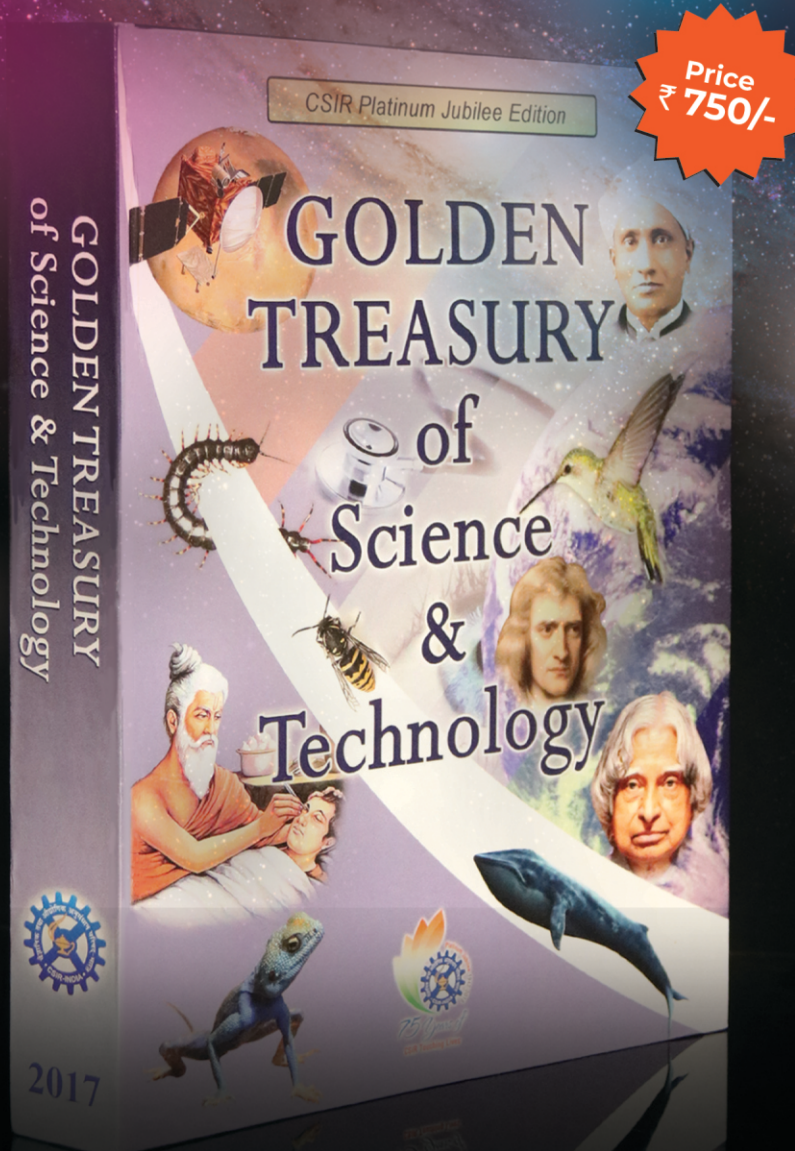

GOLDEN TREASURY OF SCIENCE & TECHNOLOGY

Platinum Jubilee Edition

Highlights

- Encyclopaedia of scientific terms
- New version updated till 2017
- Focus on Indian S&T
- Lucid, easily understandable language
- Colourfully illustrated

Pages: 564
Price: ₹ 750/-
Postage: ₹ 150/-

New Publication from Climate Change Informatics CSIR-NIScPR

A Start Up MANUAL

How to Study Stored Carbon in Mangroves

Healthy coastal habitat is not only important for seafood, livelihood and recreation, but it also plays an important role in reducing the adverse impact of climate change. Salt marshes, mangroves, and seagrass beds absorb large quantities of the greenhouse gas carbon dioxide from the atmosphere and store it, thus decreasing the pace of global warming. Present book has focused on this important issue. Apart from standardizing ecological approach in estimating stored carbon in various compartments of coastal ecosystem, the book also presents few important case studies (in the form of data bank from different coastal regions of the Indian sub-continent), which can serve as the basics of hand-on-scientific training in estimating the magnitude of stored carbon in coastal vegetation.
